

# Marc Perrien

**Senior Front End Engineer with over 20 years of experience architecting and building high-performance SaaS platforms**

Expert in Vue.js, TypeScript and UI Design Systems, specializing in the unification of complex data into intuitive, high-scale user interfaces.

**Steeple** Since April 2025

## Front-end developer

Part of a team building an internal communication SaaS tool, using Vue.js and TypeScript. My missions include:

- Building Vue 3 and Vue 2 components
- Maintaining and improve our Storybook design system
- Unit and E2E tests with Vitest et Playwright
- Features definition alongside Product Owners

**Reliably, UK** 2019–2024

## Lead front-end developer

Architected and built the primary user interface for the Reliably SaaS product, integrating RESTful APIs to visualize high-velocity data for reliability engineering.

- Created a Vue 3 SPA with Pinia
- Developed complex data visualization components
- Designed and developed a UI for our AI-powered chaos experiment definition assistant
- Created a drag and drop interface for editing complex JSON files
- Mentored back-end developers to help them contribute to the front-end codebase

**Concept Image** 2017–2019

## UX and marketing project manager

- Designed UIs (wireframes) and user journeys
  - Organized user tests sessions
  - Conducted workshops
- Customers: Direct Énergie, Atlantic, SDE35...
